SUBHAM BEHERA

Bhubaneswar, Odisha 752054

+91 8279381960 802subhambehera@gmail.com linkedIn/subham-behera https://github.com/Aer0-1

Summary

Motivated Computer Engineering undergraduate with a strong interest in data analytics, software engineering, and problem-solving. Hands-on experience in analyzing real-world datasets using Excel and Tableau, building dashboards, and presenting insights visually. Eager to contribute to data-driven decision-making and continuously enhance technical skills in collaborative environments.

Education

C.V. Raman Global University **Aug. 2023 – June 2027**

B.Tech in Computer Engineering (Software Engineering) *Bhubaneswar, Odisha*

Experience

Forage Deloitte **Nov. 2025 – Dec. 2025**

Data Analyst Intern *Remote*

- Analyzed healthcare datasets using Excel to identify trends and insights.
- Created bar graphs and visual reports using Tableau.
- Developed interactive dashboards to present findings effectively.

Projects

Health Data Analysis of Tokyo Factory Workers | *Internship Project*

- Analyzed health datasets using Excel and Tableau
- Developed dashboards and visual reports to represent insights.

Traffic Simulation System | *Personal Project*

- Developed a real-time traffic simulation for a 4-way road intersection using Python and Pygame.
- Implemented traffic signal control logic with Green–Yellow–Red timers and automatic signal switching in cyclic order.
- Designed a vehicle movement system supporting multiple vehicle types (car, bus, truck, bike) with different speed values.
- Added lane-based vehicle generation with randomized direction and vehicle type for realistic traffic flow.
- Ensured collision-free movement using stop-line detection, safe distance (moving gap), and stopping gap logic.
- Used multithreading to handle signal timing and continuous vehicle spawning without lag.
- Built an interactive simulation window with live signal indicators + countdown timer display

Odisha Tourism – Land of Temples & Tranquility | *Full-Stack Web Project*

- Built a full-stack tourism web application showcasing destinations, culture, and travel information for Odisha.
- Designed a responsive, visually engaging UI using HTML, CSS, and JavaScript, deployed on Vercel.
- Integrated structured content pages for tourist attractions, travel tips, and regional highlights.

Live: https://odisha-tourism-fullstack.vercel.app/

Skyline – Weather Application | *Personal Project*

- Developed a real-time weather web app (Skyline) that fetches and displays current weather data for any city.
- Built with HTML, CSS, and JavaScript, consuming a third-party weather API for live forecasts.
- Designed a clean, modern UI with dynamic weather condition visuals and deployed on Vercel.

Live: https://skyline-weather-app.vercel.app/

CampusTick | *Group Project – Frontend Lead*

- Collaborated in a team to build CampusTick, a campus-focused task/event management platform.
- Led the entire frontend design and development, creating an intuitive and responsive UI with HTML, CSS, and JavaScript.
- Ensured consistent visual language, accessibility, and smooth user experience across all pages.

Live: https://campustick.vercel.app/

Technical Skills

Languages: Python, Html, CSS, JavaScript, SQL
Developer Tools: VS Code, Eclipse, GitHub, Tableau, Power Bi

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Machine Learning
- Java Enterprise
- OOPs
- Database Management
- Operating System

Achievements & Certifications

- Google UX Design
- Deloitte Australia Data Analytics Job Simulation (Forage)
- Full Stack Web Development – InternsElite
- Google Project Management
- Python Certification – GeeksforGeeks
